ABOUT US

JUDE

Jude Theodore Zayac was born a healthy, happy baby boy on April 19, 2014. He gave his parents, Greg and Theo Lawless Zayac, a lifetime of love during his short time on earth. Jude enjoyed quiet naps on the dock at Lake Ariel and to the delight of his parents, got to dip his toes in the ocean and relax on the beach just two weeks before his passing. Watching his big brother, Gregory Jr., play and be silly brought endless laughs and smiles to Jude's sweet face. On July 23, 2014, Jude unexpectedly and tragically passed away at only three months old. His life was claimed by a silent killer known as "SIDS" - Sudden Infant Death Syndrome.

SIDS

Each year, there are about 3,400 sudden unexpected infant deaths (SUID) in the United States. These deaths occur among infants less than 1 year old and have no immediately obvious cause. SIDS, a medical subset of SUIDS, is the number one cause of death in infants between the ages of one month and one year. Each year SIDS claims over 2,000 lives, more than every type of childhood cancer between ages 1 and 19.

JUDE ZAYAC FOUNDATION

To honor their son, Jude, and to fight to protect other babies from this devastating syndrome, Greg and Theo Zayac established the Jude Zayac Foundation in 2015. The mission of Jude's Foundation is to raise funds to support SIDS research and to enrich the lives of living children in our community. Enrichment that Greg and Theo know in their hearts sweet Jude would have provided if he were here.

WHERE YOUR MONEY GOES

The costs of operating the Jog for Jude are 100% sustained by participant registration fees. Without the benefit of a large national non-profit network, the Jude Zayac Foundation (a 501(c)(3) nonprofit organization) is managed entirely by volunteer community leaders and activists; which means that 100% of your sponsorship dollars will go to fight SIDS and help underprivileged children in our community.

The research mission of Robert's Program at Boston Children's Hospital is to determine the causes and pathogenesis of SUDP utilizing multidisciplinary and state-of-the-art approaches. Despite the significant loss of life claimed by SIDS each year, funding for SIDS by the federal government through the National Institute of Health ("NIH") continues to decline. In fact, funding for SIDS research ranks 275 out of 309 research areas funded by NIH in 2023.
